NONPROFITS, OR OTHER
RESOURCE CONSERVATION
DISTRICTS, WHILE MAINTAINING
OUR MISSION TO THE CITIZENS
OF TEHAMA COUNTY.**

Serving Tehama County

Tehama County Resource Conservation District is a local entity whose goal is to help conserve and enhance the natural resources of Tehama County. TCRCDD encompasses all of the county's 1.9 million acres except the incorporated cities of Red Bluff, Corning, and Tehama.

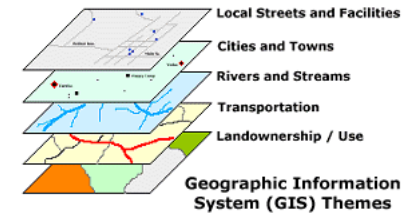

TCRCDD Vision

A balanced use of the county's natural resources, where all land use decisions are socially acceptable, environmentally sound, and economically feasible.

TCRCDD Mission

To assist citizens with managing, conserving, and improving the natural resources of Tehama County.

What is GIS?

GIS

(Geographic Information Systems)

**is a computer system
capable of capturing,
storing, analyzing, and
displaying layers of
information in 2D, 3D,
and tabular format.**

**Connecting data to its
real world location is
the "power of place."**

TCRCD provides the following GIS and Mapping services:

GIS Analysis

TCRCD can utilize the power of GIS to analyze spatial data of any kind. From natural resource management to urban and regional development planning, GIS can produce beneficial and meaningful results to assist in decision making.

Printing Services & Map Generation

TCRCD can print large format maps or posters from digital files for the benefit of conservation groups, nonprofits, or county residents on paper sizes up to 42 inches.

TCRCD's GIS analysts can provide mapping services and spatial analysis for the benefit of conservation groups, nonprofits, or other Resource Conservation Districts using ESRI software.

ArcReader Data Packaging

TCRCD's GIS analysts can package existing datasets with the free ArcReader viewer for the benefit of conservation groups, nonprofits, or other Resource Conservation Districts using ESRI software.
